

Design

FOR DESIGNERS, RANGE BUILDERS AND SAMPLE MAKERS

A flexible 3D CAD system that allows creative designers to quickly develop new ideas and concepts. Providing design tools to build ranges, experiment with more ideas and to reduce the number of physical samples. Producing virtual prototypes, data for rapid prototyping and an accurate transfer of design ideas to production.

E-LAST

LAST INPUT module

To convert imported last-data into the Shoemaster® E-Last format.

CREATIVE

3D CAD module

A 3D design tool to allow creative designers to work in the way that they want, providing them with more control over what is finally produced. 3D CAD models can be rendered to produce photo-realistic images of shoes, reducing the need to produce physical samples.

BOM

BILL OF MATERIAL module

To create a simple shoe specification with details of all materials and components to make sample shoes.
