

# Production

FOR COMPLETE MANAGEMENT OF SHOE PRODUCTION SPECIFICATIONS

A set of CAD integrated systems to specify materials and components, calculate costs and provide technical instructions on how to manufacture shoes. A modern innovative system built on a solid platform of traditional shoemaking knowledge. Providing quality product information to be transferred to ERP, PLM and other business IT infrastructures.

**APA**

**CONSUMPTIONS module**

Simple to use system for quick accurate calculations of leather and synthetic material consumptions.

**BOM**

**BILL OF MATERIAL module**

Simply create a shoe sample specification or prototype bill of material. Management of a material and components database.

**COSTING**

**COSTS CALCULATION module**

Quick costing analysis of prototype shoes taking into account material, labour, operational and overhead costs.

**TECHSPEC**

**TECHNICAL SPECIFICATION module**

Create sheets of technical instructions to define and control different phases of production e.g. stitching, skiving, gluing etc.
